Topic-1 Formation of Images

[MCQ]

#Q. The following table gives the statistics of a class in which each student opted for Maths or Statistics or both. Unfortunately most of the figures have been erased but I remember some information as follows:

1. 13 1/3% of the students took both Math's and Statistics.

2. 40% of the students were females.

3. None of the females took both Mathematics and Statistics.

$13\frac{1}{3}\% = \frac{2}{15}$

$0.4 \times 150 = 60$

$\frac{2}{15} \times 150 = 20$

	Maths	Statistics	Both	Total
Male	50	20	20	90
Female	10	50	X	60
Total	60	70	20	150

#Q.

Q.1 How many males took both Mathematics and Statistics?
- a) 40
- b) 10
- c) 20
- d) 60

Q.2 How many students took only Mathematics?
- a) 50
- b) 80
- c) 60
- d) 10

Assignment

#Q. In a class of 160 students, it was found that 65 play Cricket 70 play Hockey and 90 play Football, 30 play Cricket and Hockey, 40 Cricket and Football, 35 play Hockey and Football and 15 play none of these three games.

Q.1 How many play all three games? 25

Q.2 How many students play exactly one game?

Assignment

90

$160 - 15 = 145$

$65 + 90 + 70 = 225$

$C \Rightarrow 65$

$F \Rightarrow 90$

$H \Rightarrow 70^c$

SPATIAL APTITUDE

Non-Verbal Reasoning ?

"the ability to generate, retain, retrieve, and transform well-structured visual images"

- It's what we do when we visualize shapes in our "mind's eye."

- It's the mental feat that architects and engineers perform when they design buildings. The capacity that permits a chemist to contemplate the three-dimensional structure of a molecule, or a surgeon to navigate the human body.
